"Striving for a cleaner environment"

Wastewater treatment facilities play an important role in society, as urban and rural populations continue to grow. However these facilities become increasingly over-taxed and unable to meet the demands placed upon them. These increased demands cause many current wastewater treatment plants to operate near or at capacity. In addition, many treatment facilities were originally constructed decades ago, and utilize technology that is currently failing. Failing or inadequate treatment facilities pose an environmental concern, especially in light of increasingly stringent municipal, state, and federal environmental standards.

International Wastewater Technologies, Inc., has recognized the issues of increased energy costs, maintenance costs and the cost of failed equipment on our environment and taxpayers. It is for these reasons that we look at wastewater equipment and technologies. Equipment that will save on energy, maintenance, and can stand the rigors of the corrosive and non-forgiving environments that they must be exposed to.

Simply put, we supply our customers the **best equipment** in the industry. We do not settle for second best, and neither should you! IWT's customers range from the City and State projects, commercial customer and private customers.

1000 & 1500 Gallon Septic Tanks

With a 5 year warranty, our septic tank is strong enough to withstand a four-foot burial depth empty. A baffle wall can be installed anywhere in the tank to create two or more compartments of suitable volumes for the application.

IAPMO
CERTIFIED

A tank strong enough to withstand 32,000 pounds!

"NO ROCK" Drainage System!"

- **Foundation drains** - eliminates the need for gravel
- **Rainwater run-off** - provides collection beds to percolate rain water into the soil
- **Landscaping** - less site disruption
- **Retaining walls** - reduces hydraulic pressure by removing ground water quickly

One 10-foot unit replaces 1,000 pounds of gravel!

Stormwater Management Chamber Systems

Chambers are successfully replacing gravel and pipe in septic field installations. Lightweight construction offers lower installed costs and less intrusive installations.

The BEST wastewater treatment system ... Completely packaged for commercial, single & multi-residential, sub-division development, shopping centers, civic centers, and schools.

Aesthetically Pleasing • No Offensive Odors
• Less Land Required • Low Maintenance •
Above or Below Ground Installation • Energy
Efficient • BNR Compliant • Complete Auto-
mation • Exceeds EPA Standards of BOD &
TSS • Operator System Maintenance

Also specialize in -
Lift Stations • Grease Interceptors • Holding Tanks
Pumps • Control Panels • Blowers • Compressors

International Wastewater Technologies, Inc.

**Specializing in High Quality Equipment, Technology & Service
That Exceeds Our Customer Expectations at Competitive Prices!**

PUMPS

- Wastewater & Water
 - Submersible
 - Dry Pit Submersible
 - Sump
 - Dewatering
 - Vertical Turbine
 - Horizontal End Suction
 - Trash & Solid-Handling
 - Self Priming Centrifugal
 - Industrial Vertical Cantilever
 - Vortex • Centrifugal
 - Industrial Vertical Immersion
 - Sump
- LIFT STATIONS
- Retrofit • Complete Packages
 - Fiberglass or Concrete Vessel

FILTERS

TANKS

COMMERCIAL & RESIDENTIAL
ABOVE OR UNDER GROUND

FIBERGLASS

- Water
- Wastewater
- Septic
- Aerobic
- Grease Interceptors

Certified Under NPCA, ASTM C-857, C-858,
C890-91, C-913-02 ASTM A-16/AASHTO HS20-44

COMPRESSORS

STORMWATER CHAMBERS & LEACHFIELDS

Leaching chambers are successfully replacing gravel and pipe in septic field installations. Lightweight construction offers lower installed costs and less intrusive installations

BLOWERS

- Centrifugal, Regenerative
- Complete Packages
- Oil-Free Vacuum Pumps
- Complete Vacuum Systems
- Oil Flooded Vacuum Pumps
- Small Aerobic Wastewater Compressors

Stainless Steel or Aluminum
Self-Sealing - True UHMWPE
Self - Adjusting
ISO9001, Certified to ANSI/NSF61

DRAINAGE

Trench drain systems work well in manufacturing & industrial facilities, parking areas, swimming/sport facilities, tracks & athletic fields, high volume roadside applications, and airports.

GATES

- Sluice
- Slide
- Bulkhead
- Stop Logs
- Channel
- Flap
- Pivot
- Mud Valves
- Telescoping Valves

DIFFUSERS

Vertifuser
Diffuser Extraction System

- Fine Bubble
- Coarse Bubble

DISINFECTION SYSTEMS

- Chlorine Tablet Feed
- Ultraviolet

CONTROL & AUTOMATION

- Customer Controls & Packages
- HWL or LWL Alarm Packages
- CBT System Automation
- Control Switches
- Lift Station Packages

... AND MUCH MORE ACCESSORIES & WASTEWATER EQUIPMENT AT OUR SHOWROOM!!
